

AGREEMENT

ELSEVIER AND THE REGENTS OF THE UNIVERSITY OF CALIFORNIA

This Agreement (this "Agreement") is made effective as of *27 May 2022* (the "Effective Date") between **Elsevier B.V.**, a limited liability company with its principal offices at Radarweg 29, 1043 NX Amsterdam, The Netherlands ("Elsevier") and **The Regents of the University of California**, a non-profit academic institution, with its principal offices at The California Digital Library, University of California Office of the President, 1111 Franklin Street, Oakland, CA 94607, USA ("UC") (jointly referred to as the "Parties").

I. INTENT

Through this Agreement, the Parties seek to pilot a new type of agreement intended to facilitate a transition to Open Access (OA) publishing and transform the way that research is published, disseminated and accessed, by introducing a unique shared funding model and workflow that will allow Corresponding Authors (as defined below) affiliated with the University of California to publish accepted articles in accordance with the terms provided below. This Agreement aims to contribute to the advancement of open access publishing, and both Parties enter this Agreement with the aspiration that this Agreement will encourage a sustainable model for a transition to full open access.

Through our participation, both UC and Elsevier commit to a joint process to implement and oversee this Agreement, and to co-operate and address issues that may arise during the course of the Agreement Term (as defined below).

II. DEFINITIONS

2018 Subscribed Journals: all journals to which all ten (10) UC campuses and/or Lawrence Berkeley National Laboratory held an active subscription in 2018.

Accepted Manuscript: an author's version of the manuscript of a journal article that has been peer reviewed and accepted for publication and which typically includes author-incorporated changes suggested during submission, peer review, and editor-author communications. The Accepted Manuscript does not include other publisher value-added contributions such as copy-editing, formatting, technical enhancements and (if relevant) pagination.

Affiliated Author(s): authors who have full or part time UC appointments (including faculty, staff, and independent contractors) or who are students of UC.

Agreement Term: 1st April 2021 through to and including 31st March 2025.

Article Publishing Charge (APC): the fee Elsevier charges for making an article Open Access under this Agreement, covering all standard and customary services provided by Elsevier as part of the publishing and article hosting process, including but not limited to the services outlined in Section III.1.m (Publishing Services Commitments) below but subject to the exceptions stated in Section A1.a. of Appendix A (*Fees and Business Terms*).

Authorized Sites: as listed in Appendix B (*Authorized Sites*). For the avoidance of doubt, other institutions and organizations that reside or do business at the locations listed in Appendix B (including without limitation companies that are owned wholly or in part by, or affiliated with, UC) are not Authorized Sites, unless expressly in Appendix B.

Authorized Users: authorized users are:

Persons Affiliated with the University of California. Full and part time employees (including faculty, staff, and independent contractors of UC) and students of UC affiliated with Authorized Sites, regardless of the physical location of such persons. For Authorized Sites, see Appendix B.

Walk-ins. Patrons not affiliated with UC who are physically present within the library facilities at an Authorized Site permitted by UC to access the Content (“Walk-ins”). Remote access by Walk-ins is not permitted.

UC will promptly notify Elsevier of any substantial or atypical changes in the number of Authorized Users, which changes may result in a discussion regarding appropriate fee adjustments to take effect upon renewal.

Content: all articles and other content made available to UC in Publishing-Eligible Journals and Reading-Eligible Journals from the ScienceDirect® online service at www.sciencedirect.com in accordance with the terms of this Agreement, whether on a subscription or open access basis, during the Agreement Term, including but not limited to all Eligible Articles published Open Access under this Agreement.

Corresponding Author: the single Affiliated Author on the paper who handles the manuscript and correspondence during the publication process, from manuscript correction and proof reading, to handling the revisions and re-submission of revised manuscripts up to the acceptance of the manuscripts and corresponds with Elsevier on the same.

Creative Commons License: an open distribution license made available by Creative Commons allowing an author or other rights holder to communicate which rights they wish to extend in order to enable end-users to benefit from gratis rights to make uses of the original article, including the options of CC BY and CC BY-NC-ND, described in more detail at <https://creativecommons.org/licenses>.

Eligible Article(s): an article that is eligible for financial support by the UC Libraries (“UC Libraries”) under this Agreement. To be eligible for such support, articles must: 1) have a Corresponding Author; 2) be of an Eligible Article Type in a Publishing-Eligible Journal; and 3) have been accepted for publication in a Publishing-Eligible Journal during the Agreement Term.

Eligible Article Types:

For this Agreement, the following article types shall be Eligible Article Types:

- full length article
- short communication
- short survey
- review article
- data article
- case report
- micro articles
- original software publication
- video article
- protocols
- replication studies
- practice guidelines

Additional Eligible Article Types may be added by mutual agreement at any time during the Agreement Term in a formal amendment executed by the Parties.

Generally, types of articles where an APC is not charged (including without limitation insights, editorials, invited reviews, errata/corrigenda, or correspondence) are not Eligible Articles under this Agreement.

Final Published Article: the definitive final record of published research that appears, or will appear, in the journal and embodies all value-adding publisher activities including peer review co-ordination, copy-editing, formatting, (if relevant) pagination, and online enrichment.

Full OA Journals: Elsevier's Open Access journals, which have no subscription-based payment option and only publish open access articles, as listed in Appendix D (*Title Lists*).

Hybrid Journals: Elsevier owned and Elsevier published journals that support both subscription and open access publishing, as listed in Appendix D (*Title Lists*).

Open Access (OA): In the context of this Agreement, a publishing model that allows content to be published digitally and made accessible without charge to the end-user, subject to the terms of an applicable Creative Commons License.

Perpetual Content: Subscription Content specified in Appendix A (Fees and Business Terms) subject to payment of the applicable fees for perpetual rights as defined in section A.2 and as per the terms of section IV.7.

Publishing-Eligible Journals: journals for which multi-payer support is implemented under the Open Access Publishing Terms of this Agreement as set forth in Section III. Publishing-Eligible Journals shall comprise all Hybrid Journals and all Full OA Journals that meet one or more of the following criteria

(set forth in tabular form in Appendix D (*Title Lists*)): 1) all Cell Press, The Lancet, and Cell Press Trends journals; 2) all Full OA Journals that are not subsidized (i.e. that charge an APC directly to authors), except in the case of Third-Party Opt-Outs; 3) all Hybrid Journals that are primary research journals, except in the case of Third-Party Opt-Outs; 4) all new journals launched by Elsevier as the publisher during the Agreement Term, where these journals fall under categories 1) to 3) above; and 5) Transfer Titles, where these journals fall under categories 1) to 3) above, except Third-Party Opt-Outs. For the avoidance of doubt, subscription-only journals, a limited number of Hybrid Journals or Full OA Journals that are not primary research journals (e.g., trade journals), as well as Third-Party Opt-Outs shall not be considered Publishing-Eligible Journals. The list of Publishing-Eligible Journals and journals that are not Publishing-Eligible Journals as of the Effective Date appears in Appendix D (*Title Lists*).

Reading-Eligible Journals: journals for which reading access is made available to Authorized Users under this Agreement. Reading-Eligible Journals shall comprise all Elsevier journals that meet one or more of the following criteria (set forth in tabular form in Appendix D (*Title Lists*)): 1) all Cell Press, The Lancet, and Cell Press Trends journals; 2) all Full OA Journals; 3) all Hybrid Journals; 4) all journals contained within the Elsevier Freedom Collection, a list of which is maintained at <https://www.elsevier.com/solutions/sciencedirect/journals-books/journal-title-lists>; 5) all 2018 Subscribed Journals; 6) all journals to which UC holds an active subscription during the Agreement Term, including those that may become UC subscribed journals during the Agreement Term through title substitutions or by taking out new subscriptions; 7) all third party-owned Publishing Eligible Journals not covered in categories 4) and 6) above where the requirements set out in Section A2.f. (*Subscriptions to Third Party-Owned Publishing-Eligible Journals*) have been satisfied. The list of Reading-Eligible Journals and a list of titles excluded from reading, including subscription-only journals not in the Elsevier Freedom Collection that UC does not subscribe to, and a limited number of society-owned journals that are not Reading-Eligible Journals as of the Effective Date, appears in Appendix D (*Title Lists*).

Specialty Titles: Elsevier journals not included in the Freedom Collection or Clinics that have differentiated list prices for institutional subscribers based on institutional size or tiers, which includes Transfer Titles.

Subscription Content: all content made available to UC under this Agreement that is only available to subscribers or for which UC has purchased a subscription.

Third-Party Opt-Outs: a society-owned or partner-owned journal, where the society or partner has opted out of participation in transformative agreements and/or cannot be included for operational reasons.

Transfer Titles: journal titles published through a third-party publisher whose publication rights are transferred to Elsevier and made accessible on ScienceDirect during the Agreement Term.

UC List Price: as calculated in accordance with Section A2.a. of Appendix A (*Fees and Business Terms*).

III. OPEN ACCESS PUBLISHING TERMS

III.1. PUBLICATION OF ELIGIBLE ARTICLES

III.1.a. Open Access Publication. During the Agreement Term, all Corresponding Authors will be given the opportunity to publish their accepted Eligible Articles in any Publishing-Eligible Journal on an Open Access basis. Open Access publication will be the default (pre-selected) choice presented to Corresponding Authors of Eligible Articles in Elsevier's journal workflow. Corresponding Authors will be given the option to opt out of this default choice and publish under the subscription model if they so choose. The Corresponding Author will not be charged any APCs for articles that are published under the subscription model.

Information regarding the agreed upon OA publishing terms and opportunities available to UC authors shall be posted prominently on the Elsevier website, and clearly notified to Corresponding Authors in the Elsevier journal workflow.

III.1.b. Author Identification. In Elsevier's journal workflow, Elsevier shall provide Corresponding Authors with a list of UC institutions to select which institution they are affiliated to. Based on this data, Elsevier will provide the Corresponding Author with the relevant publishing options. Elsevier agrees to use reasonable efforts to address any significant problems with affiliation matching that may arise during the Agreement Term, including by making good faith and reasonable efforts to introduce additional affiliation or identification mechanisms into the workflow.

UC will make reasonable efforts, in conjunction with explanations provided by Elsevier in the workflow and in author instructions outside the workflow, to inform Corresponding Authors that they are required to identify themselves as being a Corresponding Author in Elsevier's journal workflow in order to benefit from the commercial arrangements under this Agreement. The Elsevier Open Access Platform ("EOA Platform") requires UC to make reasonable efforts to accurately validate that the relevant Corresponding Author is affiliated with UC, and will provide UC with the available relevant details including Corresponding Author name and e-mail address, DOI, article title, article type, journal title, license type, research funding and acceptance date of the article and the APC. UC will receive a notification via email to validate a Corresponding Author's eligibility on the EOA Platform. Elsevier agrees to work collaboratively with UC to address and resolve any problems with approval mechanisms or workflows that arise during the Agreement Term.

III.1.c. Article Publishing Charges (APCs). Eligible Articles shall be subject to a discounted APC pursuant to the provisions of Appendix A (*Fees and Business Terms*).

III.1.d. APC Subvention. In the case of Eligible Articles for which the Corresponding Author has selected the Open Access publishing option, the discounted APC shall be subject to a partial subvention (i.e., partial payment) by UC (the "UC Subvention") payable by the UC Libraries, such that the Corresponding Author is only responsible for the remainder of the discounted APC (the "APC Remainder"). The amount of the UC Subvention and related business terms appear in Appendix A (*Fees*

and Business Terms). The list price APC, discounted APC, the UC Subvention amount, and the APC Remainder shall be visible to the author in the Elsevier journal workflow.

III.1.e. Multi-Payer Workflow. A multi-payer workflow shall be established which provides a prominent choice point within the Elsevier journal workflow for when Corresponding Authors may choose to either contribute research funds towards the Article Publishing Charge by paying the APC Remainder, or request full funding of the Article Publishing Charge by UC (“Multi-Payer Workflow”). In the Multi-Payer Workflow, a Corresponding Author can choose to: 1) pay the APC Remainder her/his self from research funds; 2) request full payment of the Article Publishing Charge by UC; or 3) for Hybrid Journals only, opt out of Open Access publishing and publish the article on a subscription basis. Open Access shall be presented as the default (preselected) choice within the Multi-Payer Workflow.

If the Corresponding Author requests full payment of the APC by UC, such author will be required to select from a set of standard reasons provided by UC indicating why they do not have funding available to cover the APC Remainder. The reasons provided by Corresponding Authors shall be captured in the Elsevier journal workflow and included in the monthly reports under Section III.2 (Reporting) below.

UC, at its option, may require that the UC Subvention and/or the APC Remainder (if covered by UC) is approved by UC prior to publication and that a process to enable such approval is available. UC will have access to the EOA Platform in order to validate a Corresponding Author’s eligibility within 15 business days after Elsevier sends an eligibility validation notification to UC via the EOA Platform (“Validation Date”).

In the event that UC does not validate or rejects the eligibility of an author by the Validation Date, the relevant Corresponding Author must either change their selection to publish via the subscription model or pay the APC themselves. In such cases, Elsevier will send the Corresponding Author an invoice for the then current APC list price as of the submission date of the relevant article and such articles will not be subject to the APC payment terms of this Agreement. If the Corresponding Author is invalidated due to the author not being affiliated to with UC, such articles will be excluded from the fees and business terms as outlined in this Agreement.

III.1.f. Multi-Payer support for Cell Press and The Lancet. Established (pre-2021) Cell Press Hybrid Journals will be operationalized as part of the Multi-Payer Workflow from year 1 of the Agreement Term, reflecting the fact that these journals have always been available for open access publishing by all UC authors. All other newly converted (post 2021) Cell Press Hybrid Journals, Cell Press Trends journals and The Lancet subscription journals (together, “CP/TL Other Journals”) will be part of the Multi-Payer Workflow at least from year 3 of the Agreement Term onwards. UC has the option to include these journals as part of the Multi-Payer Workflow at any point prior to year 3 of the Agreement Term, should it wish to do so, with a minimum of three (3) months’ notice to Elsevier. Authors who choose to publish open access in CP/TL Other Journals prior to their inclusion in the Multi-Payer Workflow shall be eligible for the APC discounts described in Section III.1.c (Article Publishing Charges) above.

III.1.g. Continuity of Multi-Payer Workflow. Should the total amount of APCs or other article fees owed by UC in any given year of the Agreement Term reach the Multi-Payer Maximum

under Section A1.d. (Multi-Payer Article Base Maximum and Value Gap), inclusive of the maximum Article Growth Fee under Section A1.h. (Article Growth Fee Section) of Appendix A (*Fees and Business Terms*) such that no additional article fees are chargeable to UC, the Elsevier journal workflow shall remain unchanged: Open Access shall remain the default (pre-selected) choice, and Corresponding Authors shall continue to be presented with the Multi-Payer Workflow, including the applicable APC discount and the UC Subvention amount, and will have the option of paying the APC Remainder or requesting full coverage of the Article Publishing Charge by UC. For the avoidance of doubt, there will be no additional charges to UC based on that choice once the maximum payment threshold has been reached.

III.1.h. Expansion of Publishing-Eligible Journals. If, as of the Effective Date of this Agreement, a limited number of Elsevier journals do not yet offer OA options (see Appendix D), Elsevier shall ensure that as OA publishing options are introduced in those journals, they will become Publishing-Eligible Journals if they meet the criteria set out in the definition of Publishing-Eligible Journals and are eligible for OA publication by Corresponding Authors according to the terms of this Agreement. Elsevier will provide notice on an annual basis to UC of any such changes in eligibility status, although reasonable endeavors will be made to add journals to the publishing workflow promptly upon becoming Publishing-Eligible Journals.

III.1.i Choice of Article Licenses and Copyright. Elsevier will provide the option for all Corresponding Authors who are asked to sign a publication agreement to retain copyright to their article when publishing open access in any Elsevier-owned Publishing-Eligible Journal.

Eligible Articles, if published on an Open Access basis, will be published under a Creative Commons License selected by the Corresponding Author, with CC BY as the default (pre-selected) license choice, and CC BY-NC-ND as an author option. Corresponding authors publishing in hybrid journals will continue to have the choice to publish their journal articles on a subscription basis and these authors will not be required to request a waiver of UC's open access policy.

III.1.j. Retroactive OA Assignment. A Corresponding Author that has published an Eligible Article under a subscription model in a Publishing-Eligible Journal may notify Elsevier by 31 January of the following year that they wish to retroactively convert the Eligible Article, so that it is published OA. Elsevier will facilitate this retroactive OA publishing request as long as the article was published during the Agreement Term and the request to convert to OA is made by 31 January of the following year. Elsevier agrees to work with UC collaboratively on mechanisms for contacting Corresponding Authors who do not choose OA, to ensure they have understood their publishing options. Corresponding Authors can elect to convert Eligible Articles to OA in accordance with the timing described in this section.

III.1.k. Review of Eligible Article Types. The Parties agree that, during the Agreement Term, they will consider and mutually agree on any changes to the inclusion of some excluded article types as Eligible Articles that may be possible. Should such changes occur, the Parties will execute a formal amendment to add these additional article types to the definition of Eligible Articles.

III.1.l. Joint Implementation Team. UC and Elsevier agree to establish a joint implementation team that will collaborate on workflow implementation throughout the Agreement

Term, with good faith discussions regarding ongoing monitoring and workflow refinement aimed at streamlining the author workflow. Elsevier agrees to work collaboratively with UC to capture feedback to help guide successive iterations of the workflow.

III.1.m. Editorial Independence. For the avoidance of doubt, Elsevier is not obligated to accept or publish any article submitted to it by an Affiliated Author on the basis of this Agreement.

III.1.n. Publishing Services Commitments. Elsevier commits to complying with industry standards for ethical and quality publishing, including but not limited to The Principles of Transparency and Best Practice in Scholarly Publishing (<https://oaspa.org/information-resources/principles-of-transparency-and-best-practice-in-scholarly-publishing/>) and COPE (Committee on Publication Ethics) Core practices (<https://publicationethics.org/core-practices>). Journals that charge APCs shall continue to work collaboratively to improve accessibility for unfunded authors from lower income economies in accordance with Elsevier's waiver policy set out here: https://service.elsevier.com/app/answers/detail/a_id/5973/supporthub/publishing/~/what-is-elseviers-waiver-policy-for-open-access-fees%3F/. Elsevier will deposit Open Access articles in digital preservation services, report Open Access articles to major discovery services including nonproprietary services such as CrossRef, and host and support Open Access articles on its platforms in the same way that it does for Subscription Content. Further, Elsevier has integrated its publishing processes with the UC-codeveloped data publishing platform Dryad, an open and curated platform for researchers to share and publish their data.

III.2. REPORTING

Elsevier shall deliver a report of all articles published in all Elsevier journals (both Publishing-Eligible Journals and all others) by Corresponding Authors on a monthly basis in a mutually agreed-upon machine-readable format. Each such report shall include the following information, where available:

Corresponding Author Name
Corresponding Author Email
Journal ISSN
Journal Title
Article DOI
Full Article Title
Institute ECR
Institute Name
License Type
Publisher Item Identifier (PII)
Publication Item Type
Article Access Type
Journal categorization under the Agreement, as described in Appendix D

UC Libraries Contribution

Cumulative article count in relation to Multipayer Article Base (where applicable)

Based on this article-level report, Elsevier will generate one or more financial reports detailing the key terms of this Agreement on a mutually agreed-upon schedule, including:

- Accounting for the Credits Fund
 - Amount in the Credits Fund at the start of the year
 - Amount added to the Credits Fund throughout the year via author payments
 - Amount deducted from the Credits Fund at the end of the year to pay for CP/TL Other Journal articles and the Article Growth Fee (if any)
- Article Growth Fee
 - Number of articles above the Multi-Payer Article Base counted towards the Article Growth Fee
 - Calculations for the Article Growth Fee, as detailed in Section A1.h of Appendix A (*Fees and Business Terms*).
- Payment reconciliation, if necessary:
 - Credits from Elsevier to UC in the case that UC pays more at the start of the year than is actually owed for publishing, as detailed in Section A1.d of Appendix A (*Fees and Business Terms*).
 - Additional payment from UC to Elsevier in the case that the Credits Fund is not sufficient to pay for all CP/TL Other Journal articles and the Article Growth Fee.

Elsevier and UC agree to collaborate on additional reporting requirements as needed during the Agreement Term.

IV. READING AND PERPETUAL ACCESS TERMS

IV.1. CONTENT; GRANT OF RIGHTS

IV.1.a. Grant of Rights. Elsevier hereby grants to Authorized Sites a non-exclusive, non-transferable right to access and use the Content, including perpetual rights where applicable, and to provide Content to Authorized Users in accordance with the terms of this Agreement.

Elsevier will provide online access, and perpetual rights where applicable as provided for in Section IV.7, to all Subscription Content during the term of this Agreement, including all new and transfer journals added to the Content during the Agreement Term.

IV.1.b. Ownership of Intellectual Property. Nothing in this Agreement shall be interpreted to transfer ownership of any copyright, trademarks or service marks from Elsevier or its suppliers to the UC or Authorized Users. UC acknowledges that all right, title and interest in and to the ScienceDirect online service remain with Elsevier and its suppliers, except as expressly set forth in this Agreement. The unauthorized redistribution or dissemination online of the Subscription Content could materially and irreparably harm Elsevier and its suppliers.

IV.2. AUTHORIZED USE OF SUBSCRIPTION CONTENT

IV.2.a. Access by and Authentication of Authorized Users. UC and its Authorized Users shall be granted access to the Subscription Content pursuant to the following:

IV.2.a.i. IP Addresses. Authorized Users shall be identified and authenticated by the use of Internet Protocol (“IP”) addresses provided by UC to Elsevier. The use of proxy servers is authorized as long as any proxy server IP addresses provided limit remote or off-campus access to Authorized Users. Authorized IP Addresses are listed in Appendix C (*IP Addresses and Email Domains*). An updated list will be sent to Elsevier on an annual or as needed basis. UC and Elsevier shall endeavor to cooperate in the implementation of new authentication protocols and procedures (such as Shibboleth) as they are developed during the term of this Agreement.

IV.2.b. Authorized Uses. The Subscription Content may be used as follows:

For the avoidance of doubt, the affirmative uses designated below shall not be interpreted to limit the use of any Content that is not Subscription Content.

IV.2.b.i. General Use. Each Authorized User may:

- Access, search, browse and view the Subscription Content;
- print, download and store a reasonable portion of individual items from the Subscription Content for the exclusive use of such Authorized User;
- provide print or electronic copies of individual items from the Subscription Content to other Authorized Users and to third-party colleagues for their scholarly or research use but in no case for resale or commercial purposes;
- store individual journal articles from the Subscription Content in the private library of a social networking site for the Authorized User’s own personal use only;

- share individual journal articles from the Subscription Content with a limited number of third party colleagues as part of an invitation only working group on non-commercial platforms or tools, for personal, scholarly or research use;
- access, search, browse, view, print, make electronic copies and store for the exclusive use of such Authorized User certain journal articles and book chapters from the ScienceDirect® online service that are not subscribed to as part of the Subscription Content, with each twenty-four (24) hour access period for a selected article or chapter, a “Transaction.”; and
- if the Authorized User is a librarian/information specialist, access, search, browse, view, print, make electronic copies and store a Transaction for the exclusive use of another Authorized User.

IV.2.b.ii. Classroom Use. UC and Authorized Users may distribute single copies of individual articles or items of the Subscription Content in print or electronic form to other Authorized Users. For the avoidance of doubt, classroom handouts shall include the distribution of a copy for teaching purposes to all individual Authorized Users in a class at Authorized Sites or to Authorized Users in any sites where they engage in remote learning provided that the downloaded and printed content will carry appropriate acknowledgement of the source, title, author and publisher.

IV.2.b.iii. Course Packs (Print and Electronic). UC and Authorized Users may use a reasonable portion of the Subscription Content in the preparation of Course Packs or other educational materials provided that downloaded and printed content will carry appropriate acknowledgement of the source, title, author and publisher.

IV.2.b.iv. Course Reserves (Print and Electronic). UC and Authorized Users may use a reasonable portion of the Subscription Content for use in connection with specific courses of instruction offered by the University of California provided that downloaded and printed content will carry appropriate acknowledgement of the source, title, author and publisher and is deleted from library-controlled systems by the end of each semester or trimester in which it is used (with such deletion confirmed in writing to Elsevier upon request).

IV.2.b.v. Elsevier is a signatory to the current 2022 version of the International Association of Scientific, Technical, and Medical Publishers standards (IASTM) Permission Guidelines (<https://www.stm-assoc.org/intellectual-property/permissions/permissions-guidelines/>) and agree that its provisions apply to the content created under this Agreement.

IV.2.b.vi. Text and Data Mining.
UC and Authorized Users may:

- access the text and data mining service online via an API at <http://dev.elsevier.com> to continuously and automatically extract and index and/or process information from the Subscription Content and load and integrate the results (the “TDM Output”) on UC’s servers or text-mining system for access and use by Authorized Users; and
- distribute the TDM Output externally, which may include limited query-dependent excerpts from

individual full text articles or book chapters (“Snippets”) or bibliographic metadata, such excerpts cumulatively not being sufficient to substitute for access to the original full text article or book chapter. Where Snippets and/or bibliographic metadata are distributed, they should, if feasible, be accompanied by a DOI link that points back to the individual full text article or book chapter. Where images are used, UC and/or the Authorized User should clear the rights for reuse with the relevant copyright owner and/or rights holder. Further the TDM Output should include a notice in the following form:

“© Some rights reserved. This work permits non-commercial use, distribution, and reproduction in any medium, provided the original author and source are credited.”

Such distribution shall be sufficient to support scholarly publications based on the TDM Output.

Elsevier may request information about UC’s context for TDM research and UC will provide such information if in its possession. The text and data mining service online may be accessed by, processed, or hosted by, vendors or other third parties retained by UC only with the express written permission of Elsevier. Any such vendor or approved third party will not ingest the data for any other reasons other than research purposes of UC and will keep such extracted data, the Snippets and the TDM Output separate and segregated from any other data, and will have no right or ability to use the extracted data, the Snippets and the TDM Output in any other product or service offering.

Subscription Content, intermediate datasets and TDM Output remains the responsibility of UC and at the termination of the contracted work for UC, information from the Subscription Content, intermediate datasets and TDM Output will be returned to UC or destroyed.

UC will exercise the same degree of care and apply the same level of security control with respect to the use of the text and data mining service online and the activities under this Agreement as with UC’s own products and services. UC agrees to and accepts on behalf of its Authorized Users and engaged third party vendor(s), (if any), the limitations and conditions of use of the text and data mining service. UC will inform Authorized Users and the engaged third party vendor(s) (if any) of the terms of this Agreement and their required compliance with the conditions.

As additional restrictions in this usage grant, UC and its Authorized Users may not:

- use any robots, spiders or other automated downloading programs, algorithms or devices to search, screen-scrape, extract, or index any Elsevier website or web application, other than the text and data mining service online via an API or as permitted under this Agreement;
- create derivative products or services and/or utilize the TDM Output in a way that would directly compete with the value of the final peer reviewed journal articles or the ScienceDirect online service, or directly compete with, substitute and/or replicate any other existing Elsevier products, services and/or solutions or enhance the products or services and/or solutions of the engaged vendor or otherwise commercially use or allow commercial use of the TDM Output;
- perform text and datamining for a third party; or
- store, or permit storage of, content from the Subscription Content, extracted data, the Snippets

and/or the TDM Output on any server other than an internal server of UC, except as required for replication and summarized supporting data associated with publications that are based on the TDM Output, including storage of TDM Output through the entire lifecycle of the research.

IV.2.b.viii. Interlibrary Loan. UC may deliver journal articles from Reading-Eligible Titles (as defined herein) and, if any, book chapters from the Reading Eligible Titles to fulfill requests as part of the practice commonly known as "interlibrary loan" from non-commercial libraries located within the United States, provided that UC's staff reviews the requests and fulfills the requests in compliance with Section 108 of the U.S. Copyright Law (17 U.S.C. §108) and the Guidelines for the Proviso of Subsection 108(g)(2) (Final Report of the National Commission on New Technological Uses of Copyrighted Works, 1978).

IV.2.b.ix. Bibliographic Citations. For the avoidance of doubt, UC and Authorized Users may use citation and abstract information in faculty profiling systems, in lists of publications on faculty and institutional web pages, and to create bibliographies, including within secure personal bibliographic reference/citation management systems. UC and Authorized Users may store a single copy of an individual document that is part of the Subscription Content solely in accordance with Elsevier's sharing policy. In the event of any conflict between Elsevier's sharing policy and this Agreement, this Agreement shall prevail.

IV.2.b.x. Unlimited Access. Subject to the terms of this Agreement, UC and its Authorized Users shall have unlimited simultaneous user access to the Subscription Content.

IV.2.c. Author Publishing Policy Corresponding authors publishing in hybrid journals will continue to have the choice to publish their journal articles on a subscription basis and these authors will not be required to request a waiver of UC's open access policy. For the avoidance of doubt, Elsevier's sharing policy continues to apply for Subscription Content.

IV.3. Specific Restrictions on Use of Subscription Content

IV.3.a. Unauthorized Use. UC shall not permit anyone other than Authorized Users to access the Subscription Content. For the avoidance of doubt, remote access by Walk-ins is not permitted. The distribution of usernames/passwords and other access credentials that would permit remote access to Walk-ins, or that is otherwise made discoverable by Walk-ins, is not permitted. Furthermore, Authorized Users who are independent contractors may use the Content only for the purposes of the contracted research work for UC. Elsevier acknowledges UC Libraries do not have knowledge of the manner of use of the Content; UC will nonetheless make reasonable efforts to notify users of this requirement.

IV.3.b. Modification of Subscription Content. UC shall not abridge, modify, manipulate, translate or create a derivative work of the Subscription Content without the prior written permission of Elsevier, except as provided for under this Agreement.

IV.3.c. Removal of Copyright Notice. UC may not remove, obscure or modify any copyright or other notices or disclaimers included in the Subscription Content.

IV.3.d. Commercial Purposes. Except as otherwise provided for, UC may not use the

Subscription Content for commercial purposes, including but not limited to the sale of the Subscription Content, or fee-for-service use of the Subscription Content; nor may UC impose special charges on Authorized Users for use of the Subscription Content beyond reasonable printing or administrative costs. For the avoidance of doubt, research conducted by UC and Authorized Users that is supported by a commercial entity shall not be considered use for commercial purposes.

IV.3.e. Automated Downloading. Except as expressly stated in this Agreement or otherwise permitted in writing by Elsevier, UC and its Authorized Users may not use any robots, spiders, crawlers or other automated downloading programs, algorithms or devices to continuously and automatically search, scrape, extract, deep link, index or disrupt the working of the ScienceDirect online service.

IV.3.f. Substantial or Systematic Reproduction. Except as expressly stated in this Agreement or otherwise permitted in writing by Elsevier, UC and its Authorized Users may not substantially or systematically reproduce, retain, store locally, redistribute or disseminate online the Subscription Content.

IV.4. MUTUAL PERFORMANCE OBLIGATIONS

IV.4.a. Notification and Cure of Unauthorized Use. In the event UC has notice of an unauthorized use of the Subscription Content, UC shall promptly notify Elsevier. In the event Elsevier has notice of unauthorized use of the Subscription Content by UC, Elsevier shall promptly notify UC.

In the case of unauthorized use, Elsevier may temporarily suspend the access. In the case of protracted and unresolved use in breach of this agreement Elsevier, may require that UC suspend the access from where the unauthorized use occurred upon notice to UC, provided that Elsevier immediately notifies UC of any such suspension, including the reason for the block and any supporting details. Such temporary suspensions will be of the shortest duration possible sufficient to terminate the alleged unauthorized activity and prevent its resumption. Any unauthorized use that is considered a breach of obligations under this Agreement shall be subject to Section V. 3 (Early Termination) below, including the cure period. UC will not be liable for unauthorized use of the Subscription Content or ScienceDirect online service by any Authorized Users provided that the unauthorized use did not result from UC's own negligence or willful misconduct and that UC did not permit such unauthorized use to continue after having actual notice thereof. UC will be responsible for making reasonable efforts to support the adherence to the terms and conditions of this Agreement by a third party provider UC engages, in particular, if such third party provider supplies and manages IP addresses.

IV.5. ELSEVIER PERFORMANCE OBLIGATIONS

Elsevier agrees to the following performance standards.

IV.5.a. Availability of Content. Upon the Effective Date of this Agreement, Elsevier will make Content available to the UC and its Authorized Users at www.sciencedirect.com in accordance with the terms of this Agreement.

IV.5.b. Discovery of Content. Elsevier shall make data available to UC's Discovery Service System(s) for indexing and discovery purposes, provided Elsevier has an agreement in place with such UC's Discovery Service System(s). Elsevier shall provide to UC's discovery service vendors on an ongoing basis the citation and complete descriptive metadata (including all subject headings, abstracts, and keywords) necessary to facilitate optimal discovery and accessibility of the Content for the benefit of UC and Authorized Users, provided Elsevier has an agreement in place with such UC's Discovery Service System(s). Discovery Service Systems are defined as user interface and search systems for discovering and displaying content from local, database and web-based sources.

IV.5.c. Persistent Linking. Elsevier will endeavor to comply with the most current version of the OpenURL standard (ANSI/NISA Z39.88), and will endeavor to provide a mechanism for persistent links to Content.

IV.5.d. Online Terms and Conditions. In the event that Elsevier requires Authorized Users to agree to additional terms relating to the use of Content (commonly referred to as "click-through" or "clickwrap" licenses), or otherwise attempts to impose terms on Authorized Users through online terms and conditions invoked by the mere use or viewing of Content, in the event of any conflict between the click-through terms or online terms and conditions and this Agreement, the terms of this Agreement shall prevail, and for the avoidance of doubt, any Creative Commons license applied to Content shall take precedence over any click-through terms or online terms and conditions. Also, for the avoidance of doubt, Authorized Users are not a party to this Agreement.

IV.5.e. Quality of Service. Elsevier shall use reasonable efforts to ensure that the Elsevier's server or servers have sufficient capacity and rate of connectivity to provide the UC and its Authorized Users with a quality of service comparable to current standards in the on-line information provision industry in the UC's locale. Elsevier shall use reasonable efforts to provide continuous service seven (7) days a week with an average of 98% up-time per year. The 2% down-time excludes periodic unavailability due to server maintenance; software installation or testing; loading or making available additional Content as they become available; and unavailability because of service or equipment failure outside the control of Elsevier (including problems with public or private telecommunications services, or Internet nodes or facilities).

IV.5.f. Problems with Content. If the Content fails to operate, display, load, or render in conformance with the terms of this Agreement, UC shall immediately notify Elsevier, and Elsevier shall promptly use best efforts to restore access to the Content as soon as possible. In the event that the non-conformity materially affects the UC's or Authorized Users' use of the Content, and Elsevier fails to repair the nonconformity within five (5) business days, Elsevier shall refund to UC the amount of the Fees calculated by dividing the number of days of downtime by 365 and multiplied by the amount of the Fees for the then current year.

IV.5.g. Transfer or Acquisition of Titles. For journal titles, Elsevier will make commercially reasonable efforts to comply with the [NISO Transfer Code of Practice](http://www.niso.org/workrooms/transfer/) (Version 4.0).¹ In addition, society journal titles for which UC holds an electronic subscription through a third-party publisher whose publication rights are transferred to Elsevier and made accessible on ScienceDirect

¹ <http://www.niso.org/workrooms/transfer/>

during the Term (“Society Transferred Titles”) will be deemed Perpetual Content effective as of the date of transfer and for the then current publication year and the publication years previously paid unless and until UC notifies Elsevier that it no longer wishes to continue such electronic subscription on ScienceDirect. The option to substitute Perpetual Content does not apply to Society Transferred Titles.

IV.5.h. Notification of Modifications of Content. From time to time Elsevier may add, change, or modify portions of the Content, or migrate the Content to other formats. When such changes, modifications, or migrations occur, Elsevier shall endeavor to give notice of any such changes to UC as soon as is practicable by posting a notice at the ScienceDirect online service website or by other means.

IV.5.i. Withdrawal of Content. Elsevier reserves the right to withdraw from the Content any item or part of an item for which it no longer retains the right to publish, or which it has reasonable grounds to believe infringes copyright or is defamatory, obscene, unlawful, or otherwise objectionable. Elsevier shall endeavor to give written notice of the withdrawal to the UC in a timely manner.

IV.5.j. Itemized Holdings/Title List. Elsevier will provide to UC, prior to the beginning of the next year within the Agreement Term, an itemized holdings report in machine-readable format that specifies the titles included in the Content for the next annual term. Elsevier will use reasonable efforts to update itemized holdings reports as soon as is practicable when holdings information changes, and will provide information to Discovery Service Systems as provided for in Section IV.5.b. in a timely manner. If the Content includes material covered by the [NISO Knowledge Bases And Related Tools \(KBART\) Recommended Practice](#),² Elsevier will provide itemized holdings lists for the Content in KBART-compliant format, including a column/field for dates (YYYY-MM) of additions.

IV.5.k. Usage Statistics. Elsevier shall provide both composite Authorized Sites’ use data and itemized data for individual campuses and national laboratories listed in Appendix B (*Authorized Sites*) and as defined by IP ranges provided in Appendix C (*IP Addresses and Email Domains*), on a monthly basis. Elsevier will make commercially reasonable efforts to comply with the then currently valid COUNTER Code of Practice.

Elsevier will maintain as confidential and not disclose to any non-affiliated third party without UC’s prior written consent or as required by law any search or other usage data except in aggregated, collective or anonymized form.

Elsevier agrees to adopt practices to meet community standards for measuring the impact and use of Open Access content, as such standards emerge.

IV.5.l. Confidentiality of Personally Identifiable Information. Elsevier agrees that no personally identifiable information, including but not limited to log-ins recorded in system logs IP addresses of patrons accessing the system, saved searches, usernames and passwords, will be shared with nonaffiliated third parties, except to the degree necessary to perform under this agreement or in response to a subpoena, court order, or other legal requirement, except in aggregated, collective or anonymized form. If Elsevier is compelled by law or court order to disclose personally identifiable information of Authorized Users of patterns of use (in other than aggregated, collective or anonymized

² <http://www.niso.org/workrooms/kbart>

form), Elsevier shall endeavor to provide UC with prior written notice, so that UC or Authorized Users may seek protective orders or other remedies. Elsevier will notify UC and Authorized Users as soon as is practicable if Elsevier's systems are breached and the confidentiality of personally identifiable information is compromised.

To the extent that Authorized Users provide any personal data to Elsevier during account registration or otherwise, UC acknowledges that such information will be collected, used and disclosed by Elsevier in accordance with the Elsevier privacy policy applicable to Subscription Content and ScienceDirect online service. Each party will comply with its obligations under applicable privacy and data protection legislation with respect to the processing of personal data of Authorized Users in connection with this Agreement.

IV.5.m. Notice of the Use of Digital Rights Management Technology. In the event that Elsevier utilizes any type of digital rights management (DRM) technology to control the access to or usage of the Content, Elsevier will make reasonable efforts to provide to UC a description of the technical specifications of the DRM and how it impacts access to or usage of the Content. In no event may such Digital Rights Management Technology be used in such a way as to limit the usage rights of a UC or any Authorized User as specified in this Agreement or under applicable law. If the use of DRM renders the Content substantially less useful to the UC or its Authorized Users, the UC may seek to terminate this Agreement pursuant to the termination provisions of this Agreement in Section V. 3 (Early Termination), below.

IV.5.n. Use of Digital Watermarking Technology. In the event that Elsevier utilizes any type of watermarking technology for any element of the Content, Elsevier agrees that watermarks will not substantially reduce readability of Content and will not substantially degrade image quality. These watermarks shall not contain human readable user-related information, including but not limited to an account number, IP address, and usernames. If the use of the watermarking technology renders the Content substantially less useful to the UC or its Authorized Users, the UC may seek to terminate this Agreement pursuant to the termination provisions of this Agreement in Section V. 3 (Early Termination), below.

IV.5.o. Interoperability with Prevailing Web Browsers. Elsevier will use reasonable efforts to ensure that the Content is accessible and interoperable with prevailing web browsers and internet access tools, including, at a minimum, the most recent two major versions (current version and one version prior) and all the associated releases for those versions.

IV.5.p. Reserved.

IV.5.q. MARC Records. When applicable to the Content, at UC's request, Elsevier shall provide full OCLC-quality batched sets of MARC records at no additional cost by the date of the execution of this Agreement. Updates to existing records and new title records, matching the schedule of release and delivery of new publications, will be provided on a mutually agreed-upon schedule and in a format that renders them useful to the UC.

IV.6. UC PERFORMANCE OBLIGATIONS

IV.6.a. Agreement Terms Notification. UC will use reasonable efforts to provide Authorized Users with appropriate notice of the terms and conditions under which access to the Subscription Content is granted under this Agreement and that they must comply with such restrictions.

IV.6.b. Protection from Unauthorized Access and Use.
UC shall take appropriate measures to:

- protect against the misuse or unauthorized access, whether by UC or any third party, through or to (a) UC's credentials used to access the Content; and (b) the ScienceDirect online service and/or information derived therefrom;
- manage identification, use, access and control of all credentials used to access the Reading Eligible Journals in an appropriately secure manner, including, but not limited to, by:
 - limiting access to and use of the Reading Eligible Journals to Authorized Users;
 - issuing any passwords or credentials used to access the Reading Eligible Journals only to Authorized Users and not divulging any passwords or credentials to any third party; and
 - providing true, complete and accurate IP addresses, as identified in Appendix C (*IP Addresses and Email Domains*), (if any) for the exclusive use by UC (including, if requested by Elsevier, written confirmation by the relevant third party internet service provider) and proactively informing Elsevier of any changes to the UC IP addresses, including the addresses no longer being used exclusively by UC.
- without undue delay, deactivate any credentials when no longer needed or where access presents a security risk;
- implement appropriate policies and procedures to seek to ensure that all use of the Content is for its legitimate business purposes and in compliance with all terms and conditions herein;
- implement and maintain its own appropriate program for credentials management and use commercially reasonable efforts to follow the policies and procedures for account maintenance as may be communicated to UC by Elsevier from time to time in writing;
- on an appropriate basis, review access to the Content by its passwords or credentials used to access the Content to ensure that such access was in compliance with all terms and conditions herein; and
- promptly upon becoming aware of any unauthorized use of the Content or ScienceDirect online service, inform Elsevier and take appropriate steps to end such activity and to prevent any recurrence.

IV.6.c. Maintaining Confidentiality of Access Passwords. Where access to the Subscription Content is to be controlled by use of passwords, UC will inform Authorized Users that they should not divulge their numbers and passwords to any third party. UC will also maintain the confidentiality of any institutional passwords provided by Elsevier.

IV.6.d. Security Requirements. UC agrees that UC will have in place documented policies and procedures, which will be reviewed by UC periodically, covering the administrative, physical and technical safeguards in place and relevant to the access, use, loss, alteration, disclosure, storage, destruction and control of information. UC will promptly notify Elsevier if it determines that there has been a breach of such safeguards if such breach results in a compromise of any information provided hereunder and cooperate with Elsevier's reasonable requests surrounding such breach including taking appropriate steps to end such activity and to prevent any recurrence.

IV.7. PERPETUAL RIGHTS

IV.7.a. Perpetual Rights to Perpetual Content. Upon termination of all of UC's annual subscriptions on ScienceDirect online, UC may, at its option, (1) acquire, load and technically format on a server that enables access and use by Authorized Users an electronic copy of all or part of its Perpetual Content for the publication years paid for the applicable Authorized Sites for cost and/or (2) continue to access such Perpetual Content online for an annual access fee quoted to the Subscriber by Elsevier based on the number of full-text articles downloaded from such titles during the prior twelve (12) months at a per download rate, for UC's access to the platform, and/or (3) access such Perpetual Content titles online through the Portico® electronic archiving service provided by Portico (in which case UC will execute a separate license agreement with Portico whose terms and conditions will also govern UC's use of such Perpetual Content titles and take precedence in the event of any conflict or inconsistency with this Agreement), in accordance with the usage provisions of this Agreement, which provisions will survive the termination of the Agreement. Elsevier will make available for inspection by a duly authorized auditor of UC, at UC's sole expense, the records concerning the calculation of the annual access fee once per year during regular business hours upon thirty (30) days written notice to Elsevier. Elsevier will be entitled to inspect UC's records of usage once per year during regular business hours upon reasonable notice to UC. The electronic copy may not contain links and other features and functionality associated with the online version. If a particular Perpetual Content title is withdrawn by Elsevier or not renewed by UC, but UC remains a ScienceDirect online annual subscription subscriber, UC may continue to access online, at no additional charge, such formerly subscribed title for the publication years paid for the applicable Authorized Sites, provided that Elsevier continues to hold the electronic rights thereto.

In the event that Elsevier discontinues or changes the terms of its participation in a third-party archiving service, Elsevier shall notify UC in advance, and shall in good faith seek to establish alternative arrangements for trusted archiving and perpetual access to the Perpetual Content.

IV.7.b. Reserved.

V. GENERAL TERMS

V.1. TERM

This Agreement shall be in effect for the Agreement Term, unless terminated earlier in accordance with the provisions in Section V.3. (Early Termination).

V.2. RENEWAL

This Agreement may be renewed at the end of the current term for a successive term, subject to mutual agreement in writing between the Parties.

V.3. EARLY TERMINATION

V.3.a. Early Termination for Financial Hardship. UC may terminate this Agreement without penalty if sufficient content acquisitions funds are not allocated to enable UC, in the exercise of its reasonable administrative discretion, to continue this Agreement. In the event of such financial circumstances, UC will notify Elsevier of the intent to terminate the Agreement as soon as is reasonably possible, but in any case, no less than 30 days prior to the next payment date, and this transaction shall terminate on the last day of the period for which payment has been made without penalty of expense to UC of any kind whatsoever, except as to the portions of payments herein agreed for which funds shall have been appropriated and budgeted or otherwise available, or in the case of Eligible Articles, for which APC payments have been requested by Corresponding Authors under the Multi-Payer Workflow in Section III.1. In the event of such termination, UC shall maintain its perpetual right to materials under the periods for which it has fully paid, subject to Section IV.7. (Perpetual Rights).

V.3.b. Termination for Breach. Either party may terminate this Agreement upon prior written notice in the event of a material breach or persistent non-material breaches by the other party of any of its obligations under this Agreement and the party said to be in breach fails to cure the breach within thirty (30) days after receipt of the notice of breach. Once this Agreement ends, by early termination or otherwise, Elsevier may terminate access to the Subscription Content by UC and Authorized users, subject to Section IV.7. (Perpetual Rights), above.

V.3.c. Termination Pursuant to Section IV.5.m. UC may terminate this Agreement in accordance with Section IV.5.m (Notice of the Use of Digital Rights Management Technology).

V.3.d. Termination Pursuant to Section IV.5.n. UC may terminate this Agreement in accordance with Section IV.5.n (Use of Digital Watermarking Technology).

V.3.e. Refunds. Upon termination due to breach by Elsevier, Elsevier will refund to UC that portion of paid Fees attributable to the unused portion of the remainder of the Term of the Agreement, as well as any prepaid publishing related fees that have not been allocated prior to termination under the protocols laid out in Appendix A (*Fees and Business Terms*).

V.4. WARRANTIES

Elsevier warrants that use of Content by Authorized Users in accordance with the terms of this Agreement shall not infringe the copyright or other rights of any third party.

V.4.a. Accessibility Requirements. Elsevier shall use reasonable efforts to comply with applicable disabilities laws and regulations, and to conform to the accessibility requirements of [Web Accessibility Initiative, Web Content Accessibility Guidelines \(WCAG\) 2.0 at level AA](#)³ by supporting

³ <http://www.w3.org/WAI/guid-tech.html>

assistive software or devices such as large print interfaces, text-to-speech output, voice-activated input, refreshable braille displays, and alternate keyboard or pointer interfaces, in a manner consistent with WCAG 2.0 at level AA. Exceptions to compliance and conformance will be noted in Elsevier's then current, accurate completed Voluntary Product Accessibility Template ("VPAT"). Elsevier agrees to promptly respond to any complaint regarding accessibility of Content.

V.5. LIMITATIONS ON WARRANTIES

Except for the express warranties and indemnities stated herein and to the extent permitted by applicable law, neither party nor Elsevier's suppliers shall be liable for any indirect, special, incidental, punitive or consequential damages, including but not limited to loss of data, business interruption, or loss of profits, that arises from the use of the Content, or the inability to use the Content.

Except for the express warranties and indemnities stated herein and to the extent permitted by applicable law, in no event will the liability of Elsevier and its suppliers to UC exceed a sum equal to the Fees paid by UC hereunder during the twelve (12) month period immediately preceding the date on which the claim arose, even if Elsevier or any supplier has been advised of the possibility of such liability or damages.

Elsevier makes no representation or warranty, and expressly disclaims any liability with respect to the content of any Content, including but not limited to errors or omissions contained therein, libel, infringement of rights of publicity, privacy, trademark rights, moral rights, or the disclosure of confidential information.

EXCEPT FOR THE EXPRESS WARRANTIES AND INDEMNITIES STATED ELSEWHERE IN THIS AGREEMENT AND TO THE EXTENT PERMITTED BY APPLICABLE LAW, THE CONTENT IS PROVIDED "AS IS" AND ELSEVIER AND ITS SUPPLIERS EXPRESSLY DISCLAIM ANY AND ALL OTHER WARRANTIES, CONDITIONS, OR REPRESENTATIONS (EXPRESS, IMPLIED, ORAL OR WRITTEN), RELATING TO THE CONTENT, DATA, DOCUMENTATION OR MATERIALS PROVIDED IN CONNECTION WITH THE AGREEMENT, OR ANY PART THEREOF, INCLUDING, WITHOUT LIMITATION, ANY ERRORS, INACCURACIES, OMISSIONS OR DEFECTS CONTAINED THEREIN AND ANY AND ALL IMPLIED OR EXPRESS WARRANTIES OF QUALITY, PERFORMANCE, MERCHANTABILITY, OR FITNESS FOR A PARTICULAR PURPOSE.

V.6. INDEMNITIES

Elsevier shall indemnify and hold harmless UC and Authorized Users from and against any losses, claims, damages, awards, or penalties, including reasonable attorney's fees, that arise from any third party claim that alleges copyright infringement or other intellectual property infringement arising from the use of the Content by the UC or any Authorized User in accordance with the terms and conditions herein. If any such action or claim is made, UC shall promptly notify and reasonably cooperate with Elsevier. NO LIMITATION OF LIABILITY SET FORTH ELSEWHERE IN THIS AGREEMENT IS APPLICABLE TO THIS INDEMNIFICATION. This Section V.6 shall survive the termination of this Agreement.

V.7. ASSIGNMENT AND TRANSFER

Neither party may assign, directly or indirectly, all or part of its rights or obligations under this Agreement without the prior written consent of the other party. Neither party to this Agreement may unreasonably withhold or delay such written consent.

V.8. GOVERNING LAW

THIS AGREEMENT SHALL BE INTERPRETED AND CONSTRUED ACCORDING TO, AND GOVERNED BY, THE LAWS OF CALIFORNIA, EXCLUDING ANY SUCH LAWS THAT MIGHT DIRECT THE APPLICATION OF THE LAWS OF ANOTHER JURISDICTION.

V.9. DISPUTE RESOLUTION & VENUE

In the event of any dispute or controversy arising out of or relating to this Agreement, the parties agree to exercise good faith efforts to resolve the dispute as soon as possible, including having a meeting between the parties' responsible executives. In the event that the parties cannot, by exercise of their good faith efforts, resolve the dispute, they shall submit the dispute to informal mediation, as further described below in this paragraph. The parties shall continue to perform their respective obligations under this Agreement that are not affected by the dispute. The party invoking mediation shall give to the other party written notice of its decision to seek informal mediation, and the notice must include a description of the issues subject to the dispute and a proposed resolution thereof. Designated representatives of both parties shall attempt to resolve the dispute within five (5) working days after such notice. If those designated representatives cannot resolve the dispute, the parties shall meet at a mutually agreeable location and describe the dispute and their respective proposals for resolution to responsible executives of the disputing parties, who shall act in good faith to resolve the dispute.

If the dispute is not resolved within thirty (30) calendar days of a meeting among the parties' responsible executives, either party may pursue a legal action in court. The exclusive jurisdiction and venue for any and all actions arising out of or brought under the Agreement is in a state court of competent jurisdiction, situated in Alameda County, California (or, if applicable, the federal court located in the Northern District of California). During such court action, the parties shall continue to perform their respective obligations under this Agreement that are not affected by the dispute.

V.10. FORCE MAJEURE

Neither party's delay or failure to perform any provision of this Agreement (other than payment obligations) as a result of circumstances beyond its control including, but not limited to Acts of God, Government restrictions (including the denial or cancellation of any export or other necessary license), wars, insurrections, labor strikes or other work stoppages, and/or any other cause beyond the reasonable control of the party whose performance is affected that prevents it from fulfilling its obligations under this Agreement (any such circumstances being "Force Majeure") will be deemed a breach of this Agreement. Notwithstanding the foregoing, a party's financial inability to perform its obligations will in no event constitute a Force Majeure.

V.11. ENTIRE AGREEMENT

This Agreement constitutes the entire agreement of the parties and supersedes all prior communications, understandings, and agreements relating to the subject matter hereof, whether oral or written. For the avoidance of doubt, online terms and conditions as defined in Section IV. 5.d. (Elsevier Performance Obligations/Online Terms and Conditions) shall not modify the terms of this Agreement and any Creative Commons license shall take precedence over online terms and conditions defined in section IV.5.d.

V.12. AMENDMENT

No modification or claimed waiver of any provision of this Agreement shall be valid except by written amendment signed by authorized representatives of Elsevier and UC.

V.13. SEVERABILITY

If any provision or provisions of this Agreement shall be held to be invalid, illegal, unenforceable or in conflict with the law of any jurisdiction, the validity, legality, and enforceability of the remaining provisions shall not in any way be affected or impaired thereby.

V.14. WAIVER OF CONTRACTUAL RIGHT

Waiver of any provision herein shall not be deemed a waiver of any other provision herein, nor shall waiver of any breach of this Agreement be construed as a continuing waiver of other breaches of the same or other provisions of this Agreement.

V.15. NOTICES

All notices given pursuant to this Agreement shall be in writing (which shall be understood to include electronic mail ("Email")). Notices if sent by registered or certified mail, shall be deemed received within five (5) business days after mailing. If any notice is sent by Email or facsimile, it shall be deemed received on the date that the Email or facsimile was sent. However, if the time of deemed receipt of any notice is not before 5.30 p.m. local time on a business day at the address of the recipient, it is deemed to have been received at the commencement of business on the next business day. For the avoidance of doubt, any notice or communication contemplated by this Agreement may be executed electronically, including via Email, and signatures will be considered as equally valid as a manually executed signature if they meet the legal definition of an "electronic signature," including signatures incorporated in an electronic format (e.g., ".pdf" or ".tif"). Either party may from time to time change its Notice Address by written notice to the other party.

APPENDIX A – FEES AND BUSINESS TERMS

A1. PUBLISHING FEES AND BUSINESS TERMS.

A1.a. Article Publishing Charges (APCs). APCs charged under this Agreement shall be subject to the following discounts against list price from the Effective Date throughout the Agreement Term:

- Cell Press and The Lancet (all journals): 10% APC discount
- All other Publishing-Eligible Journals: 15% APC discount

Such discounts shall be in effect for all Corresponding Authors in all Publishing-Eligible Journals, including the CP/TL Other Journals, as of the Effective Date, regardless of the date of the journal's inclusion in the Multi-Payer Workflow. All APC discounts will be made visible to Corresponding Authors in the Elsevier journal workflow, regardless of whether the article is paid for through the Multi-Payer Workflow or a separate workflow. APCs paid outside of the Multi-Payer Workflow shall be the responsibility of the author and will not be charged to UC under this Agreement. For the avoidance of doubt, all CP/TL Other Journals will remain outside of the Multi-Payer Workflow until Year 3 of the Agreement Term, or earlier upon notice by UC to Elsevier.

APC Subvention and APC Remainder. In the case of Eligible Articles for which the Corresponding Author has selected the Open Access publishing option within the Multi-Payer Workflow, the discounted APC shall be subject to a partial subvention (i.e., partial payment) by UC (the "UC Subvention") payable by the UC Libraries, such that the Corresponding Author is only responsible for the remainder of the discounted APC (the "APC Remainder"), as provided for in Section III.1.d (APC Subvention) above. The amount of the UC Subvention shall be determined by UC at its sole discretion and may be changed by UC upon giving reasonable notice to Elsevier. As of the Effective Date, the subvention amount set by UC shall be \$1000 per Eligible Article. Subvention amounts will be consistent for all articles of a given type.

APC Remainders may be covered by UC when requested by the Corresponding Author and approved by UC. UC may, at its discretion, set a maximum library contribution for APC Remainders, with appropriate advance notice to Elsevier, in which case the Corresponding Author shall be responsible for the portion of the APC Remainder not paid by the UC Libraries.

UC Subvention payments and APC Remainder payments covered by UC will be subject to the fee controls in Section A.1 herein.

Limits on Additional Publication Charges. Corresponding Authors shall not be required to pay additional fees in association with publishing Eligible Articles beyond the APCs established under this Agreement, except in the case of submission fees or fees for specific, optional value-added services that are supplementary to publishing. All such additional fees, if ordered and/or confirmed by the author, will be charged separately based on the invoice information provided by the author and shall not be charged to or the responsibility of UC under this Agreement. Notwithstanding the foregoing, the Parties acknowledge that as of the Effective Date, a limited number of society-owned journals impose mandatory page and/or editorial charges on authors in addition to APCs. Elsevier agrees to work with its

society partners to strive for the elimination of such charges and will make reasonable efforts to avoid the imposition of additional mandatory charges for any other journals over the course of this Agreement. Should an additional society-owned journal newly introduce the requirement of mandatory page and/or editorial charges during the Agreement Term, UC and Elsevier will discuss the inclusion of such journal in this Agreement.

A1.b. Multi-Payer Article Base

The Multi-Payer Article Base (the “Multi-Payer Article Base”) shall consist of a baseline number of Eligible Articles paid for by UC via the Multi-Payer Workflow, up to a maximum number equivalent to UC’s 2019 publishing volume. Articles published above this maximum are not considered part of the Multi-Payer Article Base, and are paid for according to the Article Growth Fee parameters described below.

In year 1 of this Agreement and until such time as the CP/TL Other Journals are added into the Multi-Payer Workflow, the Multi-Payer Article Base shall consist of the first 4,307 Eligible Articles accepted for publication under the Multi-Payer Workflow in each year of the Agreement Term. When the CP/TL Other Journals are added to the Multi-Payer Workflow, the Multi-Payer Article Base shall be the first 4,594 Eligible Articles accepted for publication in that year. Should CP/TL Other Journals be added into the Multi-Payer Workflow at any point other than April 1 of a given contract year, the Multi-Payer Article Base shall be pro-rated accordingly. Eligible Articles shall be counted toward the Multi-Payer Article Base regardless of the business model choice of the author (i.e., whether published on an Open Access or subscription basis).

A reconciliation of the specific Eligible Articles accepted for publication and counted as part of the Multi-Payer Article Base for each year of the Agreement Term will take place each June, to allow sufficient time for all Eligible Articles to be captured and counted as part of this Agreement, subject to an agreed-upon process.

A1.c. Publishing Value at Discount

The Publishing Value at Discount shall be calculated for all relevant Eligible Articles in Publishing-Eligible Journals within the Multi-Payer Article Base for each year of the Agreement Term, by multiplying all relevant Eligible Articles within the Multi-Payer Article Base by the discounted APCs for the journals in which those articles are published (“Publishing Value at Discount”). Relevant articles for the purpose of this calculation include:

- for established Cell Press pre-2021 Hybrid Journals, only those Eligible Articles for which the Corresponding Author has selected the Open Access option, subject to a Cell Press minimum payment (see Section A.1.f (Minimum Payments for Cell Press and The Lancet (CP/TL) Journals) below)
- for all other Publishing-Eligible Journals, all Eligible Articles shall be counted toward the Publication Value at Discount regardless of whether the Corresponding Author has chosen to publish the article on an Open Access or subscription basis.

Payments for CP/TL Other Journals are applied outside of the Publishing Value at Discount construct and are excluded from this calculation.

A1.d. Multi-Payer Article Base Maximum and Value Gap

UC payments to Elsevier for relevant Eligible Articles within the Multi-Payer Article Base will be subject to a Multi-Payer Article Base Maximum Fee (“Multi-Payer Maximum”). The Multi-Payer Maximum shall be set at \$10,700,000 in Year 1 of the Agreement, and shall increase at a rate of 2.6% per year thereafter.

	Year 1	Year 2	Year 3	Year 4
Multi-Payer Maximum	\$10,700,000	\$10,978,200	\$11,263,633	\$11,556,488

UC will make a prepayment to Elsevier each year equivalent to the Multi-Payer Maximum, to support publishing within the Multi-Payer Article Base. Author payments for APC Remainders under the Multi-Payer Workflow are counted toward the Multi-Payer Maximum and will generate credits throughout the year that are placed in a Credits Fund, as described in Section A1.e (Credits Fund) below.

If, at the end of the year, the Publishing Value at Discount within the Multi-Payer Article Base is higher than the Multi-Payer Maximum, the difference will be attributed to a Value Gap (“Value Gap”) for true-up at the end of the Agreement as described in Section A1.j (End of Agreement True-Up) below.

If, at the end of the year, and subject to the terms set out in Section A1.g (Minimum Volume Threshold) below, the Publishing Value at Discount within the Multi-Payer Article Base is lower than the Multi-Payer Maximum, then UC will only be liable for a fee equivalent to the Publishing Value at Discount, and any excess amount already paid by UC will be credited toward the Multi-Payer Maximum prepayment for the subsequent year, unless the Parties shall mutually agree to reconcile these amounts at the End of Agreement True-Up pursuant to Section A1.j below.

A1.e. Credits Fund

Any APC Remainders collected from Corresponding Authors for Eligible Articles paid for via the Multi-Payer Workflow will generate credits of an equal dollar value against UC payments for publishing. These credits will be placed in a Credits Fund (“Credits Fund”), which shall be used to fund additional components of this Agreement. Should Corresponding Authors choose to publish their articles on an Open Access basis in the CP/TL Other Journals prior to their inclusion in the Multi-Payer Workflow, they will be charged the discounted APC list price in Section A1.a (Article Publishing Charges (APCs)) above, and any APC revenue collected for those articles will also generate credits of an equal dollar amount to be added to the Credits Fund.

Should Corresponding Authors choose to publish their articles on an Open Access basis in Third-Party Opt-Out journals that are outside of the Multi-Payer Workflow, they will be charged the then-current APC list price.

For certain journals agreed between UC and Elsevier, as set out in Appendix E, any APC revenue collected for open access articles published in these specific journals will generate credits of an equal dollar amount to be added to the Credits Fund.

The Credits Fund will be used to pay the full discounted APCs for Eligible Articles in CP/TL Other Journals for which the Corresponding Author has selected the OA option, subject to the minimum payment provisions of Sections A1.f (Minimum Payments for Cell Press and The Lancet (CP/TL) Journals) and A1.g (Minimum Volume Threshold), and to pay the Article Growth Fee, if any, (as provided for in Section A1.h). Any funds remaining in the Credits Fund after these payments are made will roll over annually, until the End of Agreement True-Up pursuant to Section A1.j below.

A1.f. Minimum Payments for Cell Press and The Lancet (CP/TL) Journals

Separate fee structures shall apply to the established Cell Press Hybrid Journals, and to the CP/TL Other Journals once the latter have been included in the Multi-Payer Workflow. All CP/TL Eligible Articles included in the Multi-Payer Workflow regardless of business model will be counted toward the Multi-Payer Article Base, but UC will only be charged for Eligible Articles in these journals for which the Corresponding Author has selected the Open Access option, with a designated annual minimum payment applicable to each journal category. In each case, the minimum payment shall be equivalent to the number of UC Eligible Articles published in those journals in 2019 multiplied by their 2020 UC-specific weighted average APC. The minimum payment shall remain constant in each year of the Agreement Term. CP/TL Full OA Journals are not subject to a minimum payment.

For the established Cell Press Hybrid Journals included in the Multi-Payer Workflow from year 1, the minimum payment shall be \$255,000. In each year of the Agreement Term, Eligible Articles in these journals for which the Corresponding Author has chosen the Open Access option will be counted toward the Publishing Value at Discount at their then-current discounted APC rate until the Multi-Payer Article Base maximum threshold has been reached. If the total discounted APC value of said articles is less than the minimum payment threshold, a make-up payment amount will be added to the Publishing Value at Discount to reach the minimum payment.

For the CP/TL Other Journals, the minimum payment shall be \$1,480,000. Eligible Articles in these journals are not counted toward the Publishing Value at Discount. Rather, in each year of the Agreement Term, Eligible Articles in these journals within the Multi-Payer Article Base for which the Corresponding Author has chosen the Open Access option will be charged against the Credits Fund at their then-current discounted APC rate; these charges will be aggregated throughout the year and paid from the Credits Fund at the end of the year. If the total discounted APC value of said articles is less

than the minimum payment threshold, a make-up payment will be charged against the Credits Fund to reach the minimum payment. Should there be insufficient funds to cover the discounted APCs for these articles or the minimum payment from the Credits Fund in a given year, any outstanding minimum payment balance shall be invoiced to UC at the end of that year.

For all CP/TL journals, Eligible Articles above the Multi-Payer Article Base for which the Corresponding Author has chosen the Open Access option will be charged according to the Article Growth Fee calculation in Section A1.h below.

A1.g. Minimum Volume Threshold

Should the number of Eligible Articles published under the Multi-Payer Workflow fall more than 20% below the maximum number of articles allowed within the Multi-Payer Article Base in any given year (e.g., 4,307 in year 1), the following controls shall apply:

- Publishing Value at Discount shall be set at 80% of the maximum number of relevant Eligible Articles within the Multi-Payer Article Base (e.g., 4,307 in year 1), times a weighted average discounted APC of relevant articles within the Multi-Payer Article Base. For the avoidance of doubt, CP/TL Other Journals are excluded from this calculation.
- If this provision is triggered and CP/TL Other Journal publication volume has decreased from the 290 articles published in 2019, the CP/TL Other Journals minimum payment in Section A1.f (Minimum Payments for Cell Press and The Lancet (CP/TL) Journals) will be recalculated as a proportional volume reduction against the 290 article baseline used to calculate the minimum payment, up to a maximum decrease of 20%.

A1.h. Article Growth Fee

An Article Growth Fee (“Article Growth Fee”) shall be charged to UC annually for articles accepted for publication above the Multi-Payer Article Base. The Article Growth Fee will be calculated on the basis of the number of Eligible Articles published up to a designated maximum, adjusted for author grant participation thresholds.

The maximum Article Growth Fee in each year of the Agreement Term is based on Elsevier’s projections for article growth in Full OA Journals, charged at a UC-weighted Full OA Journal average APC, as follows:

	Year 1	Year 2	Year 3	Year 4
Projected articles above Multi-Payer Article Base	150	283	446	645
Article Growth Fee Maximum	\$335,817	\$653,035	\$1,058,909	\$1,576,488

The Article Growth Fee will be adjusted for the actual number of Eligible Articles accepted for publication and grant participation rates by Corresponding Authors in the current year, as determined

through the following calculations:

1. the number of Eligible Articles accepted for publication above the Multi-Payer Article Base will be calculated as a percentage of total projected articles; the resulting percentage, up to 100%, will then be applied to the maximum Article Growth Fee for that year to arrive at a volume-adjusted growth fee;
2. the volume-adjusted growth fee will be further adjusted according to the following thresholds of grant participation by Corresponding Authors to determine the Article Growth Fee:

Grant Participation Rate		Fee Adjustment
Lower Bound	Upper Bound	
0%	<15%	50%
15%	<25%	60%
25%	<40%	70%
40%	<50%	80%
50%	100%	100%

For the purpose of counting Eligible Articles above the Multi-Payer Article Base and determining the grant participation rate, within the Cell Press, The Lancet, and Cell Press Trends journals, only Eligible Articles for which the Corresponding Author has chosen the Open Access option will be counted toward the Article Growth Fee. For all other Publishing-Eligible Journals, all Eligible Articles accepted for publication will be counted regardless of the business model chosen by the Corresponding Author.

The Article Growth Fee shall be charged first against the Credits Fund. Should there be insufficient funds in the Credits Fund to cover the Article Growth Fee, any outstanding balance due shall be invoiced to UC. For the avoidance of doubt, APC Remainders paid for by Corresponding Authors have no impact on the calculation or payment of the Article Growth Fee.

A1.i. SCOAP3 Journals

Elsevier is a participant in the Sponsoring Consortium for Open Access Publishing in Particle Physics (SCOAP3), an initiative to convert certain journals in high energy physics to open access. UC-authored articles in the Elsevier SCOAP3 journals (currently Physics Letters B and Nuclear Physics B as of the Agreement Effective Date) shall be excluded from all article counts and publishing charges under this Agreement.

A1.j. End of Agreement True-Up

Upon termination of this Agreement, a ‘true up’ will determine the final financial settlement between the Parties of any funds remaining in the Credits Fund after paying for the final year’s OA publishing in CP/TL Other Journals (see Section A1.f) and the final year’s Article Growth Fee (see Section A1.h) (“End of Agreement True-Up”).

As described in Section A1.d above, if the Publishing Value at Discount is higher than the Multi-Payer Maximum in any given year, Elsevier may recover the difference (the Value Gap) at the end of the Agreement from remaining funds in the Credits Fund. The amount of the Value Gap that can be recovered shall be subject to a maximum in each year of the Agreement, as follows:

	Year 1	Year 2	Year 3	Year 4
Value Gap Maximum	\$557,741	\$617,273	\$679,704	\$745,150

Any outstanding balances in the Credits Fund after the cumulative Value Gap has been fully recovered will be shared between Elsevier (40%) and UC (60%).

A2. OTHER FEES AND BUSINESS TERMS

A2.a. UC List Price

Pricing for subscriptions to current Elsevier journals shall be based on the current subscription list price set out at <https://www.elsevier.com/books-and-journals/journal-pricing/print-price-list> for each individual UC campus. Additionally:

1. Subscriptions for all ten (10) UC campuses and Lawrence Berkeley National Laboratory will be priced at a multiplier of 4x for journals that have a single institutional price.
2. Subscriptions for Specialty Titles that have separate differentiated list prices for institutional subscribers based on institutional size or tiers shall be calculated as a weighted average of the tiered list prices for each of the ten (10) UC campuses based on institutional tier multiplied by 4 (“UC Weighted Average Price”) and such subscriptions shall include all ten (10) UC campuses and Lawrence Berkeley National Laboratory. The campus tier assignments, the basis on which each tier is assigned, the list prices applicable to each tier, and the UC Weighted Average Price calculation shall be transparently shared with UC.
3. Transfer Titles to which Elsevier acquires publishing rights during the Agreement Term and to which UC held subscriptions in the previous year shall be priced at the same price as the previous year’s subscription(s) and shall be optionally purchased. If UC has no previous subscription to the Transfer Title, the price will be either the current list price for individual campus level subscriptions or the UC Weighted Average Price for a subscription for all ten (10) UC campuses and Lawrence Berkeley National Laboratory.

A2.b. Access to Reading-Eligible Journals

UC shall have online access on the Elsevier platform to the full text of all Reading-Eligible Journals published during the Agreement Term, as identified in Appendix D (*Title Lists*). UC shall have online access to the following Reading-Eligible Journals categories (set forth in tabular form in Appendix D (*Title Lists*)): 1) all Cell Press, The Lancet, and Cell Press Trends journals published since 1 January 1995 (including society and/or partner journals within those imprints); 2) all Academic Press / Harcourt Health Sciences (AP/HHS) journal titles that were accessed electronically from the IDEAL® platform prior to this Agreement published since 1 January 1993; 3) all Full OA Journals; 4) all journals contained within the Elsevier Freedom Collection since 1 January 1995, a list of which is maintained at <https://www.elsevier.com/solutions/sciencedirect/journals-books/journal-title-lists>; 5) 2018 Subscribed Journals published since 1 January 1995; 6) all journals to which UC holds an active subscription during the Agreement Term, including those that may become UC subscribed journals during the Agreement Term through title substitutions or by new subscription purchase. Where a new subscription for a journal is purchased by an individual UC campus only, such journal will only be deemed to be a Reading-Eligible Journal for that individual UC campus. For the avoidance of doubt, all perpetual rights and entitlements in previously subscribed journals and journal collections remain in full force and effect.

A2.c. Clinics Subscriptions

A subscription for Authorized Sites (including Lawrence Berkeley National Laboratory) with full perpetual rights to the 27 Clinics journals previously subscribed to at UC shall be available for an annual fee of \$140,637. Clinics titles to which individual campuses previously subscribed may also be subscribed to individually at their respective 2018 campus subscription price. Subscribing to Clinics titles will be optional in any year of the Agreement and Clinics subscriptions may be swapped for other Clinic titles of comparable value (based on the new subscription price of the respective Clinics title). New subscriptions and/or subscription swaps for individual campuses will be priced at the then-current Clinics subscription list price. New subscriptions and/or subscription swaps for all ten (10) UC campuses will be priced at a weighted average of the tiered list prices for each of the ten (10) UC campuses based on institutional tier) multiplied by 4. Subscription fees shall be held flat for the first four (4) years of the Agreement Term. A list of Clinics journals with prices is set out in Appendix F (*Clinics Journal Titles*). New Clinics subscriptions for all ten (10) UC campuses will include post-termination rights for all ten (10) UC campuses and access only for Lawrence Berkeley National Laboratory for the term of such subscription. New Clinics subscriptions for an individual campus will include post-termination rights for such campus.

A2.d. Other Subscriptions

Annual access to all other journals not otherwise considered Reading-Eligible Journals under this Agreement (including but not limited to subscription-only and Third-Party Opt-Out journals but excluding third party-owned new launch journals and Transfer Titles) may be optionally purchased for a price equal to 90% of the then-current UC List Price, and perpetual rights may be purchased for 10% of the then-current UC List Price for journals to which access for a subscription year has been purchased. Authorized Sites' subscriptions and perpetual rights shall include Lawrence Berkeley National Laboratory when purchased for all ten (10) UC campuses, excluding Clinics titles. Once subscribed, fees shall be held flat for the first four (4) years of the Agreement Term.

For any third party-owned new launch journal or Transfer Title added during the Agreement Term, in order for such journal to become a Reading-Eligible Journal, a subscription must be purchased by UC, subject to the provisions of Section A2.f. (*Subscription Access to Third Party-Owned Publishing-Eligible Journals*) below.

A2.e. Changes in Reading or Publishing Status.

If any journals that are not Reading-Eligible Journals or Publishing-Eligible Journals as of the Effective Date become available for reading or publishing during the Agreement Term, including but not limited to inclusion in the Elsevier Freedom Collection, conversion from subscription to hybrid status, journal workflow changes that enable inclusion of the journal in the Multi-Payer Workflow, society opt-in decisions, and satisfy the criteria for a Reading Eligible Journal and/or a Publishing Eligible Journal (as the case may be) under this Agreement, said journals shall become Reading-Eligible Journals and/or Publishing Eligible Journals. Elsevier shall notify UC on an annual basis of all such changes to the lists of Reading Eligible Journals or Publishing Eligible Journals.

A2.f. Subscription Access to Third Party-Owned Publishing-Eligible Journals.

For any third party-owned journal or subscription-only journal which does not fall into one of the categories described in Section A2.b, a subscription access fee must be paid by UC for such journal to become a Reading Eligible Journal.

If any such journals are or become Publishing-Eligible Journals during the Agreement Term, the subscription access fees charged for those journals shall be compared at the end of the year to the total discounted APC value of any Eligible Articles accepted for publication in that year under the Multi-Payer Workflow.

If, in any given year, the total discounted APC value of Eligible Articles published by Corresponding Authors in a given journal (“Publishing Fees”) is equal to or greater than the subscription access fees paid for that journal, the Publishing Fees paid in that year shall be put into the Credits Fund.

A third party-owned journal or subscription-only journal (which does not fall into one of the categories described in Section A2.b) will become a Reading-Eligible Journal in the following year and will remain a Reading-Eligible Journal for the remainder of the Agreement Term, if:

- a. for journals added as of the Effective Date, the Publishing Fees in 2019 equal or exceed 90% of the UC List Price, or
- b. for journals added on or after the Effective Date, the Publishing Fees in any full calendar year equal or exceed 90% of the UC List Price,

and no additional subscription fees will be charged.

Once subscription fees are no longer charged, perpetual rights to such journals may be optionally purchased according to the provisions of Section A.2.g below.

A2.g. Perpetual Rights

Authorized Sites perpetual rights (including Lawrence Berkeley National Laboratory) to all 2018 Subscribed Journals can be optionally purchased for any year of the Agreement for an annual fee of \$1,012,000, which shall be held flat for the first four (4) years of the Agreement Term. Titles from the Freedom Collection may be swapped for titles of equal or similar value, priced as 10% of the then-current subscription price multiplied by 4.

Perpetual rights can also be optionally purchased for individual journals and subsets of journals for each agreement year, for a fee of 10% of the 2018 UC Subscription fee of the given journal, or for titles to which UC has not previously subscribed, 10% of the then-current subscription price multiplied by 4, up to a maximum subscribed title value base of \$10.9M. Perpetual rights purchased beyond the maximum subscribed titles value of \$10.9M shall be priced and purchased as a new subscription at the UC List Price.

Perpetual rights can be purchased at any time during the Agreement and need not be purchased in the year for which perpetual rights are being acquired.

A2.h. Title Substitutions

Clinics subscriptions and bulk purchase of perpetual rights to 2018 Subscribed Journals shall allow for the substitution of titles of comparable value as provided for in Sections A.2.c and A2.g. Title substitutions may be implemented once annually upon notice to Elsevier between March 1st prior to the start of the next Agreement year and June 30th of the subscribing year, or at any time upon mutual agreement of the parties in writing.

A2.i. Transaction Fee

UC may purchase pre-paid Transactions ("PPT") for access to any content that is not available for reading under this Agreement upon mutual agreement of the Parties in writing. Unused PPT will either be refunded to UC one (1) year after issue upon UC's written request or forfeited one (1) year after termination of this Agreement.

A2.j. Entitlement Year. All reading entitlements, subscriptions, and perpetual rights under the Agreement shall operate on an April-March year.

A3. COVID Relief Reduction

A "COVID Relief Reduction" shall be provided over the first four (4) years term of the Agreement Term in recognition of the extended fiscal challenges faced by UC resulting from the global COVID-19 pandemic. The amount of the COVID Relief Reduction shall be \$2.1M, spread evenly over the initial four year term of the Agreement Term.

A4. Interest on Early Payments

Elsevier will pay interest to UC for early payments made by UC to Elsevier until the 15th of March of each year of the Agreement. Such interest will apply to Multi-Payer Maximum payments, subscription payments, and any perpetual rights payments that are made in advance of the year for which perpetual rights have been purchased. Interest will accrue and be calculated as of the 1st of the month following the date payment is received. The applicable interest rate will be set as of the 1st of May and will be based upon Federal Funds rate, minus 0.50 percent to cover expenses made by Elsevier, and will be based upon information as made available at <https://www.newyorkfed.org/markets/reference-rates/effr>. [The calculated interest rate will remain the same applicable interest rate until the 15th of March of the following year and the total interest amount will be due to UC on the next day.

APPENDIX D: TITLE LISTS

Journals eligible for publishing and/or reading according to the criteria set forth in the Definitions are listed in the table below. Elsevier shall provide to UC a searchable list of all titles included under this Agreement in machine-readable format, including titles excluded from reading and/or publishing, updated at least annually.

Publishing-Eligible Journals:

Cell Press, The Lancet, and Cell Press Trends journals
Full OA Journals unless subsidized (including SCOAP3) or Third-Party Opt-Outs
Hybrid Journals that are primary research journals, except Third-Party Opt-Outs
New launch journals in the above categories published by Elsevier during the Agreement Term
Transfer Titles in the above categories, except Third-Party Opt-Outs

Reading-Eligible Journals:

Cell Press, The Lancet, and Cell Press Trends Journals
Full OA Journals
Hybrid Journals
Elsevier Freedom Collection Journals
2018 Subscribed Journals
Journals to which UC holds an active subscription during the Agreement Term
New launch in the above categories published by Elsevier during the Agreement Term
Transfer Titles for which UC has purchased a subscription during the Agreement Term

The searchable, machine-readable lists shall include the following information for each journal listed (when available):

ISSN
Title
Elsevier or Society-owned
Journal Business Model
Included in Freedom Collection
Included for reading
Reason for exclusion from reading (if any)
Included for OA publishing support
Reason for exclusion from OA publishing support (if any)
2018 UC subscribed status
2018 UC contract price
2021 subscribed status and contract price (if known)
