5. The Historic Archive 1874-1992

The Historic Archive covering the period 1874-1992 inclusive has been made available to the Consortium by virtue of an Agreement dated 23rd September 2003. *by*

6. Journal of Cosmology & Astroparticle Physics, Journal of High Energy Physics, Metrologia

The above three journals will be made available to all members of the Consortium in return for [Text Deleted] to each title in 2004 and 2005, and the Base Price and the Annual Licence Fee have been amended to reflect the addition of these new publications as shown in the Schedule 2 attached to this letter.

7. Schedule 2 The Publications

The parties agree to substitute the Schedule attached to this letter in place of Schedule 2 attached to the letter of 13th February 2002.

8. Continuous Service

IOPP shall use reasonable efforts to provide continuous service seven (7) days a week with an average of 98% up-time per month. The 2% down-time includes periodic unavailability due to maintenance of the server(s), the installation or testing of software and the loading of additional licensed materials as they become available. Scheduled down-time will be performed at a time to minimize inconvenience to the Consortium and its Authorized Users.

If the licensed materials fail to operate in conformance with the terms of this Agreement, the Consortium shall immediately notify IOPP, and IOPP shall promptly use reasonable efforts to restore access to the licensed materials as soon as possible. In the event that IOPP fails to repair the nonconformity in a reasonable time, IOPP shall reimburse the Consortium in an amount equal to a percentage of the Annual Licence Fee. The percentage is the time the licensed materials fail to operate in conformance with the terms of this Agreement in the year, expressed as a percentage.

9. Electronic Links

The University of California is committed to the use of the emerging OpenURL standard to allow linking to related materials in other locations. If IOPP does not use the OpenURL standard, IOPP staff will provide information to the Consortium upon request to assist the Consortium in creating links directly from UC's library catalogs and licensed resources to the content at the journal, issue and article levels.

All other terms of the Agreement shall remain in full force and effect.
