Schedule A Open Choice Program

Integrated as part of this amendment between University of California and Springer is the use of the Springer Open Choice program. As a result of the experimental character of Open Choice in relation to access arrangements, both CDL and Springer acknowledge that several issues like reporting, fulfillment, licensing and the like have not (or not completely) been solved yet and need the input of both partners' experiences to be solved at all.

Both parties commit to share these experiences and possible solutions as part of the experiment.

1. The Open Choice arrangement

All articles originating from authors affiliated with the University of California that are accepted for publication in a Springer journal covered by this Agreement will be published as Open Choice on SpringerLink under the creative commons, attribution, non-commercial license, [\[Text deleted\]](#) This means that these articles will be freely available to the public and can be downloaded, distributed and used for derivative works, except for commercial use. This arrangement is not limited to the so called "corresponding authors", but all involved authors. [\[Text deleted\]](#)

[\[Text deleted\]](#)

Articles that have been accepted for publication within the dates as mentioned in the access arrangement are eligible for this Open Choice arrangement. For operational purposes the starting date is defined as "article submitted on or after November 1st, 2008".

2. Reporting

Springer will provide reports to CDL on a monthly basis under this arrangement. The reports will contain:

- DOI
- Corresponding author
- UC author, including specific campus affiliation
- Title of the article
- Title of the journal
- Submission date
- Acceptance date
- Online publication date

Springer will develop an email alerting mechanism for OA articles per institution both for reporting to CDL and for the customers.

3. Data delivery

Springer will deliver datafeeds to CDL in a standard format (eg, xml), containing all relevant metadata. Springer will also deliver the pdf of the published articles to CDL for deposit into its Institutional Repository. The exact contents and formatting of these feeds will be defined in cooperation between CDL and Springer.

4. Authentication of authors

CDL commits to report any misuse of authors' affiliation of which it becomes aware to Springer promptly after detection. If Springer suspects that an author affiliation has been misused, it shall report the alleged misuse to CDL, and CDL agrees to investigate the author affiliation and report its findings to Springer. Springer shall have the right to close access to the article in the case of confirmed misuse of identities.

5. Communication

The Parties agree that all external communication regarding this arrangement will be conducted in mutual consultation and consent (such consent not to be unreasonably withheld). Springer will --where desirable and within reasonable costs- assist with internal communication within UC.

Internal and external communication within CDL can start immediately when this agreement has been signed.

6. Data analysis and research

The Parties agree to set up an analysis program in order to measure the success rate of the experiments. The usage, citations, # of articles submitted, rejection rates etc. will be measured and evaluated. A standard analysis needs to be developed in cooperation between Springer Market Research and CDL.

7. Evaluation

Springer and CDL will evaluate on a regular basis (bi-yearly) the results of this arrangement, including the processes and procedures, the impact on the publishing industry, and the impact on academic use and users. Both parties agree to share opinions, information and numbers on these issues.
